

# Cannabis – It's Complicated, Especially for Kids

Recorded on October 27, 2020. What was once a relatively simple plant, cannabis (marijuana) has inspired everything from fear to fierce loyalty. We had a conversation about today's marijuana and its impact on young people's developing brains. We need to learn all we can about this evolving substance, which bears little resemblance to a plant. Our presenters addressed the effects of increased THC levels, social norms, availability, and the impact on a young, developing brain. Funded by the Montgomery County Office of Drug & Alcohol.
