

Two world experts testify before Florida House Health & Human Services Committee on the risks of early affirmative medical care of children with gender dysphoria.

On February 21, 2023, the Florida House Health & Human Services Committee heard testimony from highly respected **pediatric endocrinologist, Dr. Michael Laidlaw**, on the subject of the medical consequences of hormonal and surgical intervention in kids with gender dysphoria and from esteemed **Oxford Professor of Sociology, Michael Biggs PhD**, about the medical research behind the use of puberty blockers to suppress puberty in kids with gender dysphoria.
