Who is Dr. Miriam Grossman?

Please click the link below to access her excellent website:

<https://www.miriamgrossmanmd.com/>

Miriam Grossman MD is a physician, author, and public speaker. Before gender ideology was on anyone's radar, she warned parents about its dangers in her 2009 book, "You're Teaching My Child WHAT?"

Dr. Grossman has been vocal for many years about the capture of her profession by ideologues, leading to dangerous and experimental treatments on children and betrayal of parents. Dr. Grossman was featured in the Daily Wire's hit documentary "What Is A Woman?"

The author of four books, her work has been translated into eleven languages. After graduating with honors from Bryn Mawr College, Dr. Grossman attended New York University Medical School. She completed an internship in pediatrics at Beth Israel Hospital in New York City, and a residency in psychiatry through Cornell University Medical College, followed by a fellowship in child and adolescent psychiatry. Dr. Grossman is board certified in psychiatry and in the sub-specialty of child and adolescent psychiatry.

Parental Trauma in a World of Gender Insanity | Miriam Grossman MD | EP 347

Jordan B Peterson · 1.8M views

Dr. Jordan B. Peterson and Miriam Grossman discuss the grief and trauma associated with the Transgender movement, not just for those transitioning, but for the parents and families who now find themselves shunned and alienated if they refuse to affirm their own child's delusion.

They also go into detail on the history of the ideology, the monstrosity of Dr. John Money, and his horrendous failed experiment on which he built his doctrines.

**Dr. Grossman's newest
book: *Lost in Trans Nation***

“In *Lost in Trans Nation*, Dr. Grossman implores parents to reject the advice of gender experts and politicians and trust their guts—their parental instincts—in the face of an onslaught of ideologically driven misinformation that steers them and their children toward risky decisions they may end up mourning for the rest of their lives.

The beliefs that male and female are human inventions; that the sex of a newborn is arbitrarily “assigned”; and that as a result the child requires “affirmation” through medical interventions—these ideas are divorced from reality and therefore hazardous, especially to children. The core belief—that biology can and should be denied—is a repudiation of reality and a mockery of what hard science teaches about being male and female.”
